Enhance Security & Convenience with Integrated Access Control Systems

Access Control Features

Access Control provides real-time visibility into access-based events across office buildings. With a unified physical security platform, building administrators can:

- Centralize access control across every building, site and door across your organization. Manage everything from a single pane of glass.

- Manage exterior doors, interior doors, office air quality, physical safety, and more.

- Seamless integration between cameras, alarms, sensors, and guest management to unify your physical security system.

- Integrate physical access control with single sign on platforms to integrate physical and cyber security.

Access Control for Offices

- Up to 10-year warranty
- Unlimited users
- Automatic firmware and software updates

- Technical support
- Lower 10 year TCO
- Predictable renewal costs

Key Benefits

Native Camera Integration
Bring access events and video footage together by adding cameras to doors in just a few clicks.

Simple to Install
Access control hardware can be configured with an industry leading five wires per door. Everything else is managed in the cloud, allowing for ultimate scalability.

End to End Access Control
Manage employee credentials and access automatically from employee onboarding to employee offboarding. Easily design, print, issue and decommission employee badges.

Centralized Management
Manage multi−site corporate campuses behind a single pane of glass, and empower end−users with an intuitive cloud−based software platform.

Straight Forward Pricing
Lower total cost of ownership with automatic updates and an industry−leading 10 year warranty on all hardware.

Scalability
Add as many doors, credentials, and sites as needed. Credentials can be provisioned, utilized and monitored across multiple school sites.

Use Cases

Remote and Hands-Free Bluetooth Unlock
Unlock doors from your mobile device, or any web−based browser. Enable bluetooth to leverage any smartphone as a hands−free digital key card.

Automate Door Schedules for Office Hours
Schedule doors to automatically lock/unlock around work hours, and set exceptions to temporarily modify door access on holidays.

Configure Emergency Lockdowns
1. Trigger lockdowns from a panic button.
2. Lockdown specific rooms and exterior doors while still allowing first responders access.

Centrally Monitor Your Office Building
View access, camera and other events from anywhere. Automate alerts and notifications by receiving configurable SMS or email alerts for security events at any of your facilities.

Tiered Access to Rooms
Integrate video analytics with Access Control events. Identify possible tailgating events and responsible individuals.

Integration
Integrate with leading SCIM and SSO providers to streamline user commissioning and reduce liability with automatic off-boarding.
